DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Shiue et al (USPN 5,846,269). Shiue et al discloses a metal-bonded grinding tool comprising a base, abrasive grains bonded to the base by means of a metal bond matrix containing a Cu alloy as a main component, wherein the metal bond matrix, the metal bond matrix consisting essentially of a Cu alloy as main component, zirconium and titanium being present as an alloy phase, a mixed phase or an intermetallic compound, the metal bond matrix is in a range of 20 wt%, wherein the weight ratio of Ti and Zr is 1, wherein the Cu alloy consisting of a bronze containing 23 wt% of Sn, wherein the abrasive grains are abrasive grains of diamond or cubic boron nitrate (note Table III, col. 3, line 3 to col. 4, line 9, col. 7, line 21 to col. 8, line 25).

Allowable Subject Matter

3. Claim 3 is allowed.
4. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Art Unit: 3723

5. Applicant's arguments filed on 9 December 2004 have been fully considered but they are not persuasive. In response to applicant's argument that Shiue et al requires component elemental carbon and titanium carbide in the bond material, the carbon and titanium carbide will be present in Shiue's bond material after brazing and this material does not meet the "consisting essentially of " compositional limitation of claim 1, Shiue et al clearly shows in Table III, Comparative Example 15 that the bond matrix consisting of zirconium and titanium. Thus the material of Shiue et al meets the compositional limitation of claim 1.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

7. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
